

Über dieses Buch

Dies ist ein digitales Exemplar eines Buches, das seit Generationen in den Regalen der Bibliotheken aufbewahrt wurde, bevor es von Google im Rahmen eines Projekts, mit dem die Bücher dieser Welt online verfügbar gemacht werden sollen, sorgfältig gescannt wurde.

Das Buch hat das Urheberrecht überdauert und kann nun öffentlich zugänglich gemacht werden. Ein öffentlich zugängliches Buch ist ein Buch, das niemals Urheberrechten unterlag oder bei dem die Schutzfrist des Urheberrechts abgelaufen ist. Ob ein Buch öffentlich zugänglich ist, kann von Land zu Land unterschiedlich sein. Öffentlich zugängliche Bücher sind unser Tor zur Vergangenheit und stellen ein geschichtliches, kulturelles und wissenschaftliches Vermögen dar, das häufig nur schwierig zu entdecken ist.

Gebrauchsspuren, Anmerkungen und andere Randbemerkungen, die im Originalband enthalten sind, finden sich auch in dieser Datei – eine Erinnerung an die lange Reise, die das Buch vom Verleger zu einer Bibliothek und weiter zu Ihnen hinter sich gebracht hat.

Nutzungsrichtlinien

Google ist stolz, mit Bibliotheken in partnerschaftlicher Zusammenarbeit öffentlich zugängliches Material zu digitalisieren und einer breiten Masse zugänglich zu machen. Öffentlich zugängliche Bücher gehören der Öffentlichkeit, und wir sind nur ihre Hüter. Nichtsdestotrotz ist diese Arbeit kostspielig. Um diese Ressource weiterhin zur Verfügung stellen zu können, haben wir Schritte unternommen, um den Missbrauch durch kommerzielle Parteien zu verhindern. Dazu gehören technische Einschränkungen für automatisierte Abfragen.

Wir bitten Sie um Einhaltung folgender Richtlinien:

- + *Nutzung der Dateien zu nichtkommerziellen Zwecken* Wir haben Google Buchsuche für Endanwender konzipiert und möchten, dass Sie diese Dateien nur für persönliche, nichtkommerzielle Zwecke verwenden.
- + *Keine automatisierten Abfragen* Senden Sie keine automatisierten Abfragen irgendwelcher Art an das Google-System. Wenn Sie Recherchen über maschinelle Übersetzung, optische Zeichenerkennung oder andere Bereiche durchführen, in denen der Zugang zu Text in großen Mengen nützlich ist, wenden Sie sich bitte an uns. Wir fördern die Nutzung des öffentlich zugänglichen Materials für diese Zwecke und können Ihnen unter Umständen helfen.
- + *Beibehaltung von Google-Markenelementen* Das "Wasserzeichen" von Google, das Sie in jeder Datei finden, ist wichtig zur Information über dieses Projekt und hilft den Anwendern weiteres Material über Google Buchsuche zu finden. Bitte entfernen Sie das Wasserzeichen nicht.
- + *Bewegen Sie sich innerhalb der Legalität* Unabhängig von Ihrem Verwendungszweck müssen Sie sich Ihrer Verantwortung bewusst sein, sicherzustellen, dass Ihre Nutzung legal ist. Gehen Sie nicht davon aus, dass ein Buch, das nach unserem Dafürhalten für Nutzer in den USA öffentlich zugänglich ist, auch für Nutzer in anderen Ländern öffentlich zugänglich ist. Ob ein Buch noch dem Urheberrecht unterliegt, ist von Land zu Land verschieden. Wir können keine Beratung leisten, ob eine bestimmte Nutzung eines bestimmten Buches gesetzlich zulässig ist. Gehen Sie nicht davon aus, dass das Erscheinen eines Buchs in Google Buchsuche bedeutet, dass es in jeder Form und überall auf der Welt verwendet werden kann. Eine Urheberrechtsverletzung kann schwerwiegende Folgen haben.

Über Google Buchsuche

Das Ziel von Google besteht darin, die weltweiten Informationen zu organisieren und allgemein nutzbar und zugänglich zu machen. Google Buchsuche hilft Lesern dabei, die Bücher dieser Welt zu entdecken, und unterstützt Autoren und Verleger dabei, neue Zielgruppen zu erreichen. Den gesamten Buchtext können Sie im Internet unter <http://books.google.com> durchsuchen.

This is a reproduction of a library book that was digitized by Google as part of an ongoing effort to preserve the information in books and make it universally accessible.

GENERAL INDEX
TO THE
FIRST TWENTY-FOUR VOLUMES
OF
THE JOURNAL
OF
MENTAL SCIENCE,

BY
G. FIELDING BLANDFORD, M.D.,
Late President of the Medico-Psychological Association ;

WITH HISTORICAL SKETCH
BY
D. HACK TUKE, M.D.,
Co-Editor of the Journal.

LONDON:
J. & A. CHURCHILL,
New Burlington Street.

MDCCCLXXIX.

HISTORICAL SKETCH

OF

THE ASSOCIATION.

IN connection with this Index to the Journal of the "Association of Medical Officers of Hospitals for the Insane," as it was in the first instance called, it seems but natural to recur to the origin and trace the course of the now prosperous and powerful "Medico-Psychological Association." I have, therefore, willingly acceded to Dr. Blandford's request to write a brief sketch of its past history.

It originated in a circular addressed to all the medical men known at that time to be connected with the public Lunatic Asylums of the Kingdom. This circular, dated June 19, 1841, stated that as it had long been felt desirable that medical men connected with lunatic asylums should be better known to each other—should communicate more freely the results of their individual experience—should co-operate in collecting statistical information relating to insanity, and above all, should assist each other in improving the treatment of the insane—several gentlemen who have the conduct of lunatic asylums have determined on making an attempt to form "an Association of the Medical Officers of Lunatic Asylums."

The circular requested an opinion on the proposed Association, and enquired whether co-operation might be expected. It

451293

was signed by Dr. Samuel Hitch, the Resident Physician of the Gloucester County Asylum. This proposal was sent to 83 medical men, and in reply 44 consented to belong to the Association. A meeting of those desirous of assisting in its formation took place at the Gloucester Asylum, July 27, 1841. At this, the first meeting, there were present in addition to Dr. Hitch, Dr. Shute (in the chair), Mr. Gaskell, of the Lancaster Asylum, Dr. Powell, of the Nottingham Asylum, Dr. Thurnam, of the York Retreat, and Dr. Wintle, of the Oxford Asylum. An Association to be composed of medical men connected with the treatment of the insane was instituted, and it was decided to meet annually, at a Public or Private Lunatic Asylum, and to have for its object the intercommunication of all matters calculated to improve the treatment, care, and recovery of the insane.

The following are the principal resolutions which were passed :—

1. That this meeting considers itself competent to establish the Association proposed in the circular.

2. That an Association be formed of the Medical Officers attached to "Hospitals for the Insane," whose object shall be improvement in the management of such institutions and the treatment of the insane ; and the acquirement of a more extensive and more correct knowledge of insanity.

3. That by the members of this Association the terms "lunatic" and "lunatic asylum" be abandoned except for legal purposes, and that the terms "insane person" and "hospital for the insane" be substituted.

4. That to effect the great objects of this Association, visits be made annually to some one or more of the Hospitals for the Insane in the United Kingdom.

5. That at its meetings the Association ascertain and record, as far as possible, the medical and moral treatment adopted in each Hospital.

6. That at the meetings, papers and essays be read, subjects of interest to the insane and to the Association be discussed, and information communicated, and that a copy or minutes of these be preserved in the journal of the Association (*i.e.* a manuscript minute-book).

7. That the first annual meeting be held at Nottingham.

The Committee of the Gloucester County Asylum warmly supported the movement. Dr. Hitch was appointed the Honorary Secretary, and Dr. Shute, his colleague at

Gloucester, the Treasurer. Two days were spent in presiding over the birth of the infant society—

“The baby figure of the giant mass
Of things to come.”

In November of the same year, the Association met, as decided upon, at the Nottingham Asylum, under the presidency of Dr. Blake, of Nottingham.

At this meeting, rules were drawn up, and some resolutions passed, among which one deserves to be recorded here, namely, “That without pledging themselves to the opinion that Mechanical Restraint may not be found occasionally useful in the management of the insane, the members now present have the greatest satisfaction in recording their approbation of and in proposing a vote of thanks to those gentlemen who are now engaged in endeavouring to abolish its use *in all cases*.”

In the following year (June 2, 1842), the Association met at Lancaster, Dr. De Vitre presiding. He was at that time physician to the Lancashire County Asylum, the superintendent being Mr. Gaskell, who was a very warm promoter of the Association. The third annual meeting was held at Morley’s Hotel, London, under the presidency of Dr. Conolly, the members present numbering eight, namely—the President, Dr. Sutherland, Dr. De Vitre, Mr. Gaskell, Dr. Stewart, Mr. Poynder, Dr. Pritchard (Northampton), and Dr. Hitch.

On this occasion, it was resolved to visit the Hanwell Asylum, St. Luke’s, and the Surrey Asylum, and three days were spent in visiting these institutions, and in reading and discussing papers—an example worthy of imitation.

In 1844, the Association met at the York Retreat, Dr. Thurnam being the President. The following members were present—Mr. Tuke, of York; Dr. Formby, of Liverpool; Dr. Prichard, of Bristol; Dr. Wintle, of Oxford; and Dr. Stewart, of Belfast, with five visitors, viz., Dr. Hodgkin, London; Dr. Fowler, Salisbury; Mr. Caleb Williams, Visiting Surgeon to the Retreat; and Mr. Alderson, of the York Asylum.

The York meeting remains memorable in consequence of a communication received from the Editor of the “German Journal of Insanity,” Dr. Damerow, of Halle, expressing the hope on behalf of the Association in Germany that their English

confrères "would follow the example of the former by publishing a Periodical devoted to the same important subject, by which means a mutual exchange of Publications might take place, which would be highly beneficial to both nations." This proposal was thereupon discussed by the meeting, and a resolution adopted declaring it to be "deserving of the best consideration of this Association."

This resolution was never lost sight of, and was frequently discussed among the members, although the Association did not see its way to carry it out for some years. At the Annual Meeting, held at Oxford (Dr. Wintle in the chair), July 20, 1852, "Mr. Ley ably advocated the establishment of a journal for the use of the Members of the Association, and submitted to the meeting several propositions connected therewith, which will appear in the first number of the Journal. Dr. Bucknill addressed the meeting at considerable length on behalf of Mr. Ley's propositions, in which he was supported by Dr. Conolly, who spoke of the treasures hidden in asylum case-books, which would become known by the establishment of a Journal. An interesting discussion ensued, and it was finally resolved, on the motion of Mr. Ley, seconded by Dr. Thurnam, that the Journal be undertaken." (Extract from Minute-book.)

It was also decided to elect Dr. Bucknill the Editor. The wisdom of the choice was evidenced by the manner in which from 1853 until 1862, the editorial pen was wielded. The Journal became not only a literary success, but the fears entertained by some members of the Association that the funds would not be forthcoming, happily proved groundless, the worthy Treasurer, Mr. Ley, being soon able "to congratulate himself on being prepared to meet any claims on the Association."

It may not be without profit as well as interest to recall what, as stated in the Prospectus, were the objects of the "Asylum Journal of Mental Science" (or, as the late Dr. Thurnam preferred calling it, of "Insanity") when the first number was issued, November 15, 1853:—

"The aim and objects of the 'Asylum Journal' will be to afford a medium of intercommunication between men engaged in the construction and management of asylums, in the treatment of the insane, and in all subsidiary operations; it will therefore embrace topics, not only interesting to medical men, but to visiting justices, asylum architects, and chaplains;

nothing will be excluded which is not foreign to the modern system of the care and treatment of the insane. It will be a record of improvements and experiments in psychotherapeutics; whether in medicine, hygiene, diet, employment and recreation; or in the construction, fittings, organisation and management of asylums. It will notice new opinions in the physiology of the nervous system and the neurological observations and discoveries of every kind. . . . An object of the Journal of much utility, though of minor importance to those above stated, will be that of making known throughout all asylums the want of any one of them; of supplying a medium for asylum advertisements."

We observe that at the Annual Meeting, held in London in 1855, Dr. Sutherland moved, and Mr. Ley seconded, a resolution "that the 'Asylum Journal' be published quarterly instead of every six weeks, with an amended type and external cover." After a considerable discussion and the proposal of several amendments, this resolution was carried.

It may here be stated that it was agreed to change the name of the Journal from its original title, "The Asylum Journal of Mental Science," to that which it at present bears, at the Annual Meeting in 1858.

If it be asked what literary work the Journal has accomplished, we may content ourselves with pointing to the present volume. *Si monumentum quæris, circumspice.*

The change in the title of the Association was made in 1865, when the revised Rules which have been in force up to the present time were adopted. The original title has already been given; but subsequently and up to 1865, the words "Asylums and" were introduced before those of "Hospitals for the Insane."

Looking back over the now nearly 40 years that the Association has been established, no one, we think, will be disposed to doubt that its career has fully justified its foundation, and that through its periodical meetings, as well as through its Journal, it has contributed to achieve the objects for which it was originally declared to be instituted, viz., that alienists should be better known to each other, that they should communicate more freely the results of their individual experience, should co-operate in collecting statistical information relating to insanity, and, above all, should assist each other in improving the treatment of the insane.

Lunacy legislation has been carefully watched by the

Association, and the weight of its influence given to measures calculated to advance the true interests of the insane, while modifications have been urged when, in the opinion of the Association, these interests were endangered by measures contemplated by the Legislature.

Of the financial success of the Association, the best proof is to be found in the fact that the last annual statement of the Treasurer exhibits a balance in its favour of £480—the number of members being now 390. Success has marked the past history of the Medico-Psychological Association and its attempts at articulate expression through its Journal. In the past, and in the present, we read the promise of the future. It will be the duty of the historian of the Association in years to come to record whether this promise has been fulfilled.

It must, in conclusion, be stated that this Index originated with, and has been prepared by Dr. Blandford, who, when President of the Association in 1877, offered to mark his year of office by undertaking the work for the Association. The Annual Meeting, it need scarcely be said, gratefully accepted Dr. Blandford's proposal.

D. HACK TUKE.

NOTE.—As the numbers of pages 1-297 in vol. vii. occur twice, those in the second portion (Nos. 37 and 38) are marked by an asterisk (*).
